KSQ Mifare RFID 13.56MHz 19mm CAM LOCK

KSQ-7453 MCL

The latest addition to the KSQ range of locker locks is the KSQ 7453-MCL RFID Cam Lock. This is the most cost effective solution for upgrading conventional key or combination operated cam locks to key-less and code-less operation using RFID technology. With a 19mm diameter cylinder it's the perfect retrofit for all cam locks installing in literally 2 minutes. There are two cylinder lengths, 20mm for steel lockers and 30mm for timber lockers up to 20mm door thickness. The Mifare 13.56MHz Classic 1K technology makes this lock compatible with all other Mifare 1K Classic RFID cards and fobs used f in many access control systems that represents substantial savings on user cards. The 7453 MCL can be set for Public One-time user mode or Private Assigned User mode and features Master Override Fobs, Management Fobs and Temporary User and Multi-User access by card, fob or wristband. manufactured from solid steel and alloy body with a stylish satin chrome outer knob to compliment a matte white or matte black fascia.
